

New Industry Event at Fette Compacting: Pharmaceutical Circle Celebrates Premiere on 4 and 5 September

Schwarzenbek, 5 September 2019 – Fette Compacting's exclusive Pharmaceutical Circle got off to a successful start: over 150 invited guests discussed trends in the pharma industry and challenges in the production of solid dosages under the heading "Agile Pharmaceutical Production – From Vision to Action". The new, dialog-oriented event format combined traditional conference elements, such as keynote speeches and panel discussions, with interactive hands-on workshops and opportunities to explore cross-sectoral ideas.

The specialized engineering company showed how visions can be transformed into practical reality with inspirational expert contributions. While the keynote speeches and panel discussions on the first day examined the practicality of visions and new trends, the second day focused on the topic "Pharmaceutical Production: The Way Ahead".

Following the presentation of the first machine in the i Series (see separate press release), the participants examined the practical challenges and possible solutions in four workshops. The program covered the trend toward containment, digitalization in production and service, the transition to continuous production and the fleet management of production machines.

In view of the very positive feedback, Olaf J. Müller, CEO LMT Group and Division President Fette Compacting, also came to an encouraging conclusion: "We were very eager to see how the industry would receive the first Pharmaceutical Circle. High-level expert talks, intensive exchange in discussions, networking and hands-on workshops – the event has surpassed our expectations, and the feedback from our guests is encouraging us to develop the format further and also to implement it internationally in the future."

**About Fette Compacting**

Fette Compacting is the leading international supplier of integrated solutions for the entire process of industrial tablet production. It is also the only manufacturer of tablet presses and capsule filling machines to operate its own global network with fully equipped and interactively networked Competence Centers in Germany, the USA, Brazil, India and China. Fette Compacting is a member of the LMT Group, a medium-sized, family-owned group of companies. More than 2,300 people work for the companies of the LMT Group at over 20 locations worldwide. The Group achieved a turnover of 415 million euros in the 2018 financial year.
