Launch – tablet press F10i

The new tablet press F10i from Fette Compacting is a flexible and powerful single rotary press for small batches – with or without HPAPIs.

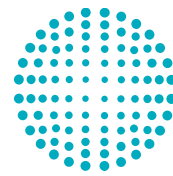

FETTE
COMPACTING

Innovative: In the press room of the F10i, around 50 percent of all enclosure parts have been removed, thus reducing the surfaces to be cleaned by around 70 percent.

Integrative: The new i Series features the technical connectivity for the latest production environments, including process equipment integrated via plug-and-play.

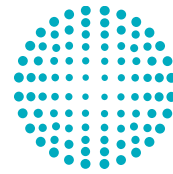

FETTE
COMPACTING

Intelligent: The customer Intranet provides 24/7 access to production data and documentation as well as the opportunity to monitor the machine using mobile terminals.

Intuitive: A workflow operation wizard facilitates the adjustment of the tablet press.
