# The heart of tableting

What drives performance in tablet production? Tableting is more than just a crucial step in the active ingredient's journey to the patient. As a key process, it has great potential for improving the overall plant performance.

But in the light of the pharmaceutical industry's growing cost pressures, the demands on production performance are increasing constantly.

The Pmax® turret with FS12® punches from Fette Compacting is the ideal solution for this market requirement. For standard applications, the optimized FS12® punch allows over 40 % higher output with unchanged production time. Without additional investments or a higher need of human resources, the production efficiency can be significantly optimized.

**FS12® Punch – higher output**

- + Optimized punch head
- + Identical flat surface area similar to EU19
- + Punch head diameter 19 mm
- + Long dwell times

- + Punch shaft diameter 12 mm

**TECHNOLOGY** stands for everything we offer in production technology – from tablet presses and capsule filling machines through Process Equipment to tableting tools and format parts.

**SERVICE** covers all the services related to machines, Process Equipment and installations such as spare parts supply, plant modernization and technical field service department.

**COMPETENCE** is the overarching idea behind all our process-related services. This includes training, product trials, application and Performance Consulting as well as engineering.

FEATURES	BENEFITS
+ Optimized punch head	+ Long dwell times
+ Higher number of punches per compression	+ Up to 40 % higher output
+ More punches at the same time under the compression station	+ Smooth machine running
+ No further machine investments necessary	+ Higher return on investment
+ Production parameters and characteristics stay unchanged	+ No further machine adjustments necessary
+ Single tablet rejection of bad tablets	+ 100 % quality assurance through in-process-control
+ Single compression force measurement even with small tablet diameters	+ Approved alternative to multi-tip tooling
